# Case study: The Lancasters project

---

## The Project :

Based in London's glamorous Hyde park, the £500m Lancasters development to transform a row of 19th century Grade II listed houses into 77 sumptuous apartments, valued from £1m to £35m has now been completed.

Precision Timber Handrails were asked to create all of the beautiful bespoke, curved and complex handrails to match the opulent interiors of the apartments and public areas throughout .

Such a large scale job required precise planning to suit the demands of the project as PTH managed multiple call offs over a 6 month period to meet the needs of the client as the project progressed.

## In Detail :

Renowned for exceptional levels of quality, professionalism and reliability, Precision Timber Handrails were chosen to deliver an exceptional, consistent finish throughout the entire project.

To give an idea of the scale of the task:

40 Digital surveys carried out by PTH in house surveyors using state of the art digital measuring equipment.

121 Different flights varying from small mezzanine designs to 6 floor continuous flights.

560 Linear meters of straight rail manufactured for fitting in apartments and public spaces inside the Lancasters.

545 Bespoke curved sections designed and manufactured at the PTH design studio by the expert team - All custom made, all FSC and all perfect.

7 Communal stair rails through concierge areas and leisure facilities.

0 Errors throughout the whole project, at every stage PTH delivered perfection, first time, everytime.

In conclusion :

Exact planning, professional design and manufacture, plus dedicated contract management all combined in this project to ensure that Precision Timber Handrails delivered consistently stunning tailor made handrailing throughout the whole Lancasters development to a perfect finish.
